STANDARD		1.0	11	12	τv	11	T2	IV	- 11	12	
JIANDARD	GROUND LEVEL ITEMS										
1	Road wheels and hubs – caps, bolts, nuts and studs										
2	Tyres – size, ply rating and type										
3	Tyres – condition, tread wear, cuts, wall contact on twins										
4	Trailer drawbar and eye hitch, turntable and fixings										
5	Cab floor and steps										
6	Security of all major fixings to chassis including structural supports										
7	Mirrors – number and condition										
8	Rear & side markings, reflectors position and condition										
9	Obligatory side lamps, end outline lamps and stop lamps										
10	Direction indicators, hazard lamps colour and functioning										
11	Headlamp alignment position and function										
STANDARD	CHASSIS										
12	Condition of chassis and attachments, cracks, bolts, rivets, welds, braces and plates										
STANDARD	BRAKES										
13	Correct operation of i) service brake ii) sec brake iii) hand/park brake										
14	Routing & Security of brake pipes and lines										
15	Air/Vac warning and build up										
16	Brake wheel units, security, leaks, corrosion, condition of linings/pads, seizure, correct operation										
17	Brake pipe hoses, reservoirs, valves, connections security, leaks, adjustment, hydraulic/air couplings, load sensing valve (if fitted)										
STANDARD	SUSPENSION										
18	Springs, pins, bushes & hangars, Suspension units, radius arms, torsion bars										
19	Attachment of axles, subframe arrangements & suspension units										
20	Shock absorbers (if fitted), security and freedom from leaks										
STANDARD	STEERING										
21	Axles, stub axles and wheel bearings free from wear & fracture										
22	Steering linkage, wear fracture, security, no fouling										
23	Steering box smoothness of operation, security, wear, road wheels don't foul										
24	Power steering security, leaks, fractures, effectiveness
